Certain conditions, exclusions and clauses apply to all sections of this insurance. It is important that **you** read them carefully, as they apply at all times.

### \* Important Notice - Information **you** have given **us**

## PROTECT YOUR UNOCCUPIED HOME DURING THE WINTER MONTHS

From the 1st of October the days start to get shorter and the weather gets colder.

A sudden cold snap can catch you off guard and even a small leak from a pipe could cause hundreds of pounds of damage. We would like to take this opportunity to remind you of the importance of winterising your unoccupied home during the winter months.

Escape of Water has a maximum limit of £10,000 per claim and unless precautions are taken, damage by water leaking from a pipe, boiler or water tank can cost considerably more than this.

To try and protect yourself as much as possible from the upset and damage caused by an Escape of Water we suggest that you try and protect your property by taking one of the actions below.

### Mini Drain Down

1. Turn off your stopcock
2. Sinks and plugholes to be left unobstructed
3. Ensure all water taps are left open/on, plugs are removed from plugholes, water is emptied from cistern and sinks/showers/bath

### Full Drain Down

1. Turn off your stopcock
2. Locate external water drainage plugs in your home and open them
3. Ensure all water taps are left open/on, plugs are removed from plugholes, water is emptied from cistern and sinks/showers/bath
4. Sinks and plug holes to be left unobstructed
5. Ensure that any water heaters are drained (other than in respect of a proprietary sealed central heating system containing anti-freeze)
6. It is advisable to ensure that all exposed piping is adequately lagged. It is also advisable to add a small amount of non-toxic anti-freeze into any remaining water in the bowl or toilet as well as traps in the sinks and showers.
